Location: 11120 International Dr, Rancho Cordova, CA Section/Unit: CCSAS Project/Technical Development
Bureau/Systems Management/200-1585/1587
Salary Range: \$4611-5882/\$5064-6465 Number of Vacancies: 1

Job Description: (includes typical duties)

This is an exciting job opportunity with the Franchise Tax Board working on the California Child Support Automation System Project. The successful candidate will work with a group of Technical Architects and Specialists to design, build, and maintain a state of the art system.

Under general direction and supervision of the Supervising Technical Architect, the SSS is expected to work independently and as part of Project Teams using a variety of systems management technology database administration skills and apply these skills to solve business and technological problems. The incumbent will work closely with other members of the Systems Management Section and Business Partners to help define and document architecture, requirements, designs, processes, and procedures related to Database Design, Database Architecture and Database Administration. The SSS is responsible for complex systems management and systems software activities, including installation, maintenance, and troubleshooting, in support of the data & database management systems.

Required Knowledge, Skills, Abilities:

- Experience with database administration in a large computing environment with enterprise RDBMS
- Experience with data modeling for applications and data warehouses
- Experience in SQL programming.
- Excellent technical troubleshooting, analysis, and problem solving skills related to database administration
- Strong interpersonal and communication skills, and ability to work successfully in a team environment while demonstrating initiative and independence
- Strong organizational skills and ability to successfully manage concurrent assignments
- Strong documentation and writing skills.

Desirable Experience/Qualifications:

- Familiarity with Large Scale UNIX systems and configurations in support of web and database systems (e.g. IBM pSeries, HACMP)
- Implementation of security policies
- A broad knowledge of all technical disciplines required to support a mission-critical system
- Experience performing critical analysis on technical documents
- Ability to effectively communicate technical information to a non-technical audience
